SUMMARY

I am a web developer with an eye for design, skilled in Ruby, JavaScript, Rails, Bootstrap and Materialize. With experience working in fast-paced environments, I'm a team player who can work efficiently and collaboratively with others to meet hard deadlines. I have excellent communication and organizational skills along with analytical experience that has proven effective in past projects and work environments.

PROJECTS

LOCALEYES

<http://www.localeyestrips.com>

An app that connects tourists to day trips curated by locals. Made in 7 days as a group project.

- Built with Ruby on Rails backend and Materialize frontend frameworks (Materialize is based on the Google Material Design philosophy)
- Incorporate Google Maps and Google Places API to retrieve information for created day trips
- Assist with set up of Google Maps integration into web app and logic behind pulling information from Google
- Use JQuery and AJAX for commenting, favoriting and communicating with Google Places API
- Responsible for styling and organizing inbox and messaging system between users; made use of the Mailboxer gem
- Assist with the set up of Facebook OAuth and implementation of Devise security gem

LOWER EAST SIDE FILM FESTIVAL

<http://www.les-film-festival.herokuapp.com>

A fake film festival website that allows users to review and rate films. Made in 2 days as a group assignment at Dev Bootcamp.

- Built with Ruby on Rails on the backend and Bootstrap CSS framework on the frontend
- Heavy involvement in crafting the app architecture
- Style and organize pages for each film, which included sections devoted to posting comments and reviews
- Use JQuery and AJAX to enhance user experience with commenting and rating film entries
- Tested with RSpec and Capybara
